2013-2017
The best UK growth prospects for jobs and output

4,500 acres
of parkland, lakes, rivers and woodland in Milton Keynes

Avoiding the commuter dash. Enjoying the early morning run.

More and more employers consider employee wellbeing as part of their location and growth strategy. In addition to the flexibility and convenience that Milton Keynes' road network offers, a system of cycle trails and recreational paths (called redways) extend nearly 300km around Milton Keynes' parks, lakes and rivers making for a scenic commute to the business park by cycle. Many employees of the park regularly utilise its surroundings for pre and post-work recreation – from walking and jogging to watersport activities.
